auth ▼

POST	/auth/register	Register a new user	post_auth_register
POST	/auth/verify_registration	verify a user registration	post_auth_verify_registration
POST	/auth/login	User Login	post_auth_login
POST	/auth/code_login	User Login through code via email or phone	post_auth_code_login
POST	/auth/valid_login_code	User Login through code via email or phone	post_auth_valid_login_code
POST	/auth/profile	User Profile (Rich Detail)	post_auth_profile
POST	/auth/update	update user profile	post_auth_update
POST	/auth/verify	verify user email and phone	post_auth_verify
POST	/auth/user_exist	check if a user already exist	post_auth_user_exist
POST	/auth/terminal_register	register account from terminal	post_auth_terminal_register
POST	/auth/terminal_login	login account from terminal	post_auth_terminal_login

POST	/auth /phone_register	Register a new user though phone number only	post_auth_phone_register
POST	/auth /verify_phone_register	verify a user's phone registration	post_auth_verify_phone_register
POST	/auth/update_password	update user password only	post_auth_update_password
POST	/auth/phone_login	User phone login	post_auth_phone_login
POST	/auth /apple_wallet	Generate and return an Apple Wallet (.pkpass) digital membership card.	post_auth_apple_wallet
POST	/auth/credit_history	Get user credit change history	post_auth_credit_history
POST	/auth /update_password_by_id	Update user password using user_id directly.	post_auth_update_password_by_id
POST	/admin /verify_registration	verify a user registration	post_admin_verify_registration

wallet

POST	/auth /apple_wallet_store	Generate an Apple Wallet Store Card.	post_auth_apple_wallet_store
------	------------------------------	--------------------------------------	------------------------------

notify

POST	/auth /send_wallet_email	Send Wallet Pass via Email for both Apple Wallet and Google Wallet	post_auth_send_wallet_email
POST	/notification/send_sms	send a message to sms.	post_notification_send_sms
POST	/notification /send_email	send a message to email.	post_notification_send_email
POST	/notification /update_wallet	Send a silent push notification to update an Apple Wallet pass.	post_notification_update_wallet

product

POST	/product/add	Add Product	post_product_add	
POST	/product/update	Update Product	post_product_update	

POST	/product/update_prepare	update prepare time for a Product	post_product_update_prepare	
POST	/product/find_all	Find All Products	post_product_find_all	
GET	/product/find_all	Find All Products	get_product_find_all	
POST	/product/delete	Delete Product	post_product_delete	
POST	/product/detail	Get Product by ID	post_product_detail	
POST	/product/upload_media	Get Product by ID	post_product_upload_media	
POST	/product/remove_image	remove a image assoicate with the product	post_product_remove_image	
POST	/product/add_category	add a category for a product	post_product_add_category	
POST	/product/remove_category	remove a category for a product	post_product_remove_category	
POST	/product/category_list	display list of product belong to a category	post_product_category_list	
POST	/product/all_category	display all category in the existing system	post_product_all_category	
POST	/product/delete_category	detele a category in the existing system	post_product_delete_category	
POST	/product/add_category_parent	add a category for its parent.	post_product_add_category_parent	
POST	/product/sub_category	get sub category for a category.	post_product_sub_category	
POST	/product/add_option	Add an option	post_product_add_option	
POST	/product/update_option	Add an option	post_product_update_option	
POST	/product/delete_option	Add an option	post_product_delete_option	

POST	/product/add_option_item	Add an option	post_product_add_option_item	🔒
POST	/product/add_combo_option_item	Add a combo option item for product	post_product_add_combo_option_item	🔒
POST	/product/update_option_item	Add an option	post_product_update_option_item	🔒
POST	/product/delete_option_item	Add an option	post_product_delete_option_item	🔒
POST	/product/option_item_media	Add an media to an option item, new media will override the old media, if media is empty string, it will remove	post_product_option_item_media	🔒
POST	/product/option_detail	option_detail	post_product_option_detail	🔒
POST	/product/link_option	link an option	post_product_link_option	🔒
POST	/product/unlink_option	unlink an option	post_product_unlink_option	🔒
POST	/product/add_recipe	add a recipe to a product	post_product_add_recipe	🔒
POST	/product/get_recipe	get a recipe from a product	post_product_get_recipe	🔒
POST	/product/batch_details	Get detailed information for a list of Product IDs	post_product_batch_details	🔒

order

POST	/order/add	Add Order	post_order_add	
POST	/order/add_none_user	Add Order	post_order_add_none_user	
POST	/order/history	User Order History	post_order_history	
POST	/order/all_history	All Order History	post_order_all_history	
POST	/order/temp_order_paid	check if a temp order is paid or not	post_order_temp_order_paid	

POST	/order/temp_order_cancel	cancel a temp order	post_order_temp_order_cancel
POST	/order/gst	given an order_id, calculate the gst associate with it	post_order_gst
POST	/order/update_order_status	Order update order status	post_order_update_order_status
POST	/order/status_history	Given a order_id, return the status history of the order	post_order_status_history
POST	/order/add_device_order	Add Order from our device selling shop when user place order	post_order_add_device_order
POST	/order/get_device_order	get Order from our device selling shop for user place order	post_order_get_device_order
POST	/order/init_table_order	Init a Table Order Session	post_order_init_table_order
POST	/order/add_table_order	Add Order to a table order session	post_order_add_table_order
POST	/order/get_table_order	Get table order	post_order_get_table_order
POST	/order/finish_table_order	finish table order	post_order_finish_table_order
POST	/order/shop_table_order	get table order	post_order_shop_table_order
POST	/order/update_order	update order, include its product, qtys and option items	post_order_update_order
POST	/order/batch_update_order	update order, include its product, qtys and option items	post_order_batch_update_order
POST	/order/pay_order	complete order, include its product, qtys and option items	post_order_pay_order
GET	/order/{order_id}	Get full details of a specific order, including transaction history	get_order__order_id_
POST	/order/void_order	Void an order (soft delete) by changing status to 'voided'	post_order_void_order

POST	/order /pay_table_order	complete all unpaid orders within a table order session	post_order_pay_table_order
POST	/order /batch_pay_table_order	batch process all unpaid orders within a table order session	post_order_batch_pay_table_order
POST	/order /table_order_history	get table order history	post_order_table_order_history
POST	/order /history_table_order	given a table order id, get the table order detail	post_order_history_table_order
POST	/order /get_shop_active_orders	Get all active orders for a specific shop (grouped by table session)	post_order_get_shop_active_orders
POST	/order /get_order_transactions	Get all transactions for a specific order	post_order_get_order_transactions
POST	/order /refund_order	Process a refund for a batch of items and record the financial transaction.	post_order_refund_order
POST	/vend /temp_order_paid	check if a temp order is paid or not	post_vend_temp_order_paid

collect

POST	/collect /add	Add Collect Code, and if non-active code exist, delete them from the order	post_collect_add
POST	/collect/detail	Collect Code Detail	post_collect_detail
POST	/collect/collect	Collect Order	post_collect_collect

admin

POST	/admin/register	Register a new admin	post_admin_register
POST	/admin/login	Admin Login	post_admin_login
POST	/admin /terminal_login	Terminal Login, using an admin account, the token will be expire for 90 days	post_admin_terminal_login

POST	/admin/profile	Admin Profile	post_admin_profile
POST	/admin/user_order	See user order detail	post_admin_user_order
POST	/admin/last_modified_time	Last Modified Time	post_admin_last_modified_time
POST	/admin/list_user	List all users	post_admin_list_user
POST	/admin/user_detail	See User detail	post_admin_user_detail
POST	/admin/delete_user	Delete a user	post_admin_delete_user
POST	/admin/add_user_note	Add a note for a user	post_admin_add_user_note
POST	/admin/update_user_by_id	Update any user attributes by user_id directly without a token (inc token / security later)	post_admin_update_user_by_id
POST	/admin/create_admin_direct	Directly register a new admin without email/SMS verification.	post_admin_create_admin_direct
POST	/pos/add_credit	Add credit to a user account, the user must belong to the business this admin can manage	post_pos_add_credit

vend

POST	/vend/get_token	Retrieve a vending machine token using a MAC address.	post_vend_get_token
POST	/vend/add	Retrieve a token for a specific vending machine using its MAC address.	post_vend_add
POST	/vend/update	Update a vending machine	post_vend_update
POST	/vend/delete	Delete a vending machine	post_vend_delete
POST	/vend/all_product	Get all products linked with the vendor that is active	post_vend_all_product
POST	/vend/find_mac	Find a vending machine by MAC	post_vend_find_mac

POST	/vend/find_all	Find all vend machines	post_vend_find_all
POST	/vend/detail	Delete a vending machine	post_vend_detail
POST	/vend/ /last_modified	Retrieve a vending machine last modified time using a id.	post_vend_last_modi fied
POST	/vend/make_order	Make an order from the a vending machine	post_vend_make_order
POST	/vend/ /temp_order	Make an temp order from the a vending machine	post_vend_temp_orde r
POST	/vend/ /temp_order_dispen se	dispense an temp order from the a vending machine	post_vend_temp_order_ dispense
POST	/vend/ /temp_order_remove	remove an temp order from the a vending machine	post_vend_temp_order_ remove
POST	/vend/ /enough_product	check if there are enough product from the vending machine	post_vend_enough_p roduct
POST	/vend/add_category	add a category for a vending machine	post_vend_add_category
POST	/vend/ /remove_category	remove a category for a vending machine	post_vend_remove_categ ory
POST	/vend/ /category_list	show a list of vend machine that belong to a category	post_vend_category_ list
POST	/vend/add_grid	Add grid to a vending machine	post_vend_add_grid
POST	/vend/ /view_grid	view grid that linked to a vending machine, 0 means empty slot	post_vend_view_g rid
POST	/vend/ /view_grid_v2	view grid that linked to a vending machine, 0 means empty slot	post_vend_view_gr id_v2
POST	/vend/ /update_ slot	update a slot in grid that linked to a vending machine, if product_id is -1, then the slot will be cleared IMPORTANT: this one is not used for refilling !!!	post_vend_ update_slo t
POST	/vend/ /remove_grid	remve a grid that linked to a vending machine	post_vend_remove_gri d
POST	/vend/ /change_grid	change a grid dimension that linked to a vending machine	post_vend_change_g rid
	/vend/ /miss		

POST	_order	manage miss-dispensed product during dispensing process, new order-id would be automatically linked with older order's user-id , if user-id is none they could just use the order-id as reference to get a refund.	post_vend_miss_order
-------------	---------------	--	-----------------------------

Search

POST	/search/user_search	Search for user based on a query.	post_search_user_search
-------------	----------------------------	-----------------------------------	--------------------------------

POST	/search/product_category_search	Search for products within a specific category, validated against the business_id.	post_search_product_category_search
-------------	--	--	--

POST	/search/product_search	Search for products based on a query.	post_search_product_search
-------------	-------------------------------	---------------------------------------	-----------------------------------

POST	/search/vend_search	Search for vends based on a query.	post_search_vend_search
-------------	----------------------------	------------------------------------	--------------------------------

POST	/search/order_search	Search for orders based on a query. Time of orders is modified to refjec tthe query time	post_search_order_search
-------------	-----------------------------	--	---------------------------------

POST	/search/warehouse_search	Search for warehouse based on a query.	post_search_warehouse_search
-------------	---------------------------------	--	-------------------------------------

POST	/search/purchase_search	Search for purhcase order based on a query.	post_search_purchase_search
-------------	--------------------------------	---	------------------------------------

POST	/search/supplier_search	Search for supplier based on a query.	post_search_supplier_search
-------------	--------------------------------	---------------------------------------	------------------------------------

POST	/search/option_search	Search for option based on a query.	post_search_option_search
-------------	------------------------------	-------------------------------------	----------------------------------

POST	/search/kiosk_search	Search for kiosks based on a query.	post_search_kiosk_search
-------------	-----------------------------	-------------------------------------	---------------------------------

POST	/search/business_search	Search for business based on a query.	post_search_business_search
-------------	--------------------------------	---------------------------------------	------------------------------------

POST	/search/shop_search	Search for a shop based on a query.	post_search_shop_search
-------------	----------------------------	-------------------------------------	--------------------------------

POST	/search/settle_search	Search for settles based on a query.	post_search_settle_search
-------------	------------------------------	--------------------------------------	----------------------------------

POST	/search/order_search_v2	Search for vends based on a query. The return order is sorted by time in decending order, (most recent to oldest)	post_search_order_search_v2
-------------	--------------------------------	---	------------------------------------

POST	<code>/search/order_status</code>	Search for an order status based on order id. Sorted by time in decending order, (most recent to oldest)	<code>post_search_order_status</code>
POST	<code>/search/credit_change_search</code>	Search for credit change history based on a query.	<code>post_search_credit_change_search</code>
POST	<code>/search/reward_change_search</code>	Search for reward point change history based on a query.	<code>post_search_reward_change_search</code>
POST	<code>/search/transaction_search</code>	Search for transactions based on a query.	<code>post_search_transaction_search</code>
POST	<code>/membership/coupon_plan_search</code>	Search for coupon plans based on a query.	<code>post_membership_coupon_plan_search</code>
POST	<code>/membership/member_coupon_search</code>	Search for issued member_coupons	<code>post_membership_member_coupon_search</code>
POST	<code>/membership/card_plan_search</code>	Search for card plans based on a query.	<code>post_membership_card_plan_search</code>
POST	<code>/membership/member_card_search</code>	Search for issued member cards	<code>post_membership_member_card_search</code>

meta

POST	/meta/add_meta	Add Metadata Entry	post_meta_add_meta
POST	/meta/get_meta	Get Metadata Entry	post_meta_get_meta
POST	/meta/remove_meta	Remove Metadata Entry	post_meta_remove_meta
POST	/meta/upload_media	Upload image Metadata Entry	post_meta_upload_media
POST	/meta/remove_media	remove image Metadata Entry	post_meta_remove_media
POST	/meta/get_image	get image Metadata Entry	post_meta_get_image
POST	/meta/image_list	get image list in the Metadata Entry	post_meta_image_list
POST	/meta/add_shop_logo	add a logo to a shop	post_meta_add_shop_logo
POST	/meta/add_shop_banner	add a banner to a shop	post_meta_add_shop_banner

warehouse

POST	/warehouse/add	Add a warehouse to database.	post_warehouse_add
POST	/warehouse/update	update a warehouse detail.	post_warehouse_update
POST	/warehouse/delete	delete a warehouse and all associate stocks	post_warehouse_delete
POST	/warehouse/detail	update a warehouse detail.	post_warehouse_detail
POST	/warehouse/stock	change stock of warehouse.	post_warehouse_stock
POST	/warehouse/get_stock	Get stock of warehouse including nested option item stocks.	post_warehouse_get_stock
POST	/warehouse/remove_stock	remove stock of a product in a warehouse.	post_warehouse_remove_stock

POST	/warehouse/restock_list	Given the list of restocking vend_id, return a restocking list that display how many product is needed to restock	post_warehouse_restock_list
POST	/warehouse/add_supplier	add supplier to system.	post_warehouse_add_supplier
POST	/warehouse/add_purchase_order	add purchase order to a warehouse.	post_warehouse_add_purchase_order
POST	/warehouse/get_purchase_order	get purchase order	post_warehouse_get_purchase_order
POST	/warehouse/update_purchase_order	update purchase order	post_warehouse_update_purchase_order
POST	/warehouse/update_purchase_order	update purchase product within a purchase order, if change is 1, add a purchase product, if change is 0 update product in purchase_product_id, if change is -1 delete product in purchase_product_id	post_warehouse_update_purchase_order
POST	/warehouse/approve_order	approve a purchase order and update warehouse qty	post_warehouse_approve_order
POST	/warehouse/delete_order	delete a purchase order	post_warehouse_delete_order
POST	/warehouse/allocate_stock	allocate stock to a vend grid	post_warehouse_allocate_stock
POST	/warehouse/return_stock	return stock from vending machine to warehouse, system will remove qty amount of product from the slot and add them in the warehouse, if the slot donot have enough stock or product_id not match, system will raise error	post_warehouse_return_stock
POST	/warehouse/stock_history	get a stock history of specific stock	post_warehouse_stock_history
POST	/warehouse/assign_option_stock	Assign stock to an Option Item in a specific warehouse.	post_warehouse_assign_option_stock
POST	/warehouse/get_option_stock	Get the stock quantities for multiple Option Items in a Warehouse.	post_warehouse_get_option_stock

dashboard

POST	/dashboard/storeStatistics	Get detailed store statistics.	post_dashboard_storeStatistics
POST	/dashboard/metric	Get a metric for the entire system.	post_dashboard_metric

POST	/dashboard/sales	Get a sales for the vending machine. If vend_id is all, it will return all sales, not just for specific vend machine	post_dashboard_sales
POST	/dashboard/settlement_report	Get a settlement report from a machine. If please specify the type of device, e.g. vend or kiosk, it will return sales amount, number, associate with shop per day. (start from today 0:00 to now)	post_dashboard_settlement_report
POST	/dashboard/add_settlement_report	Add a settlement report from a machine.	post_dashboard_add_settlement_report
POST	/dashboard/compute_daily_reports	Force re-calculation of Daily Reports for a specific date range.	post_dashboard_compute_daily_reports
POST	/dashboard/clear_daily_reports	Clear daily reports. If shop_id is provided, clear that shop.	post_dashboard_clear_daily_reports
POST	/dashboard/query_orders	Execute a custom MongoDB query against the order collection.	post_dashboard_query_orders
POST	/dashboard/query_transactions	Execute a MongoDB query against transactions.	post_dashboard_query_transactions

Business Dashboard

POST	/dashboard/business_sales	Get aggregated business sales statistics (Fast Mode).	post_dashboard_business_sales	
------	---------------------------	---	-------------------------------	--

promotion

POST	/promotion/credit_update	edit user's credit	post_promotion_credit_update
POST	/promotion/add_promotion	edit user's credit	post_promotion_add_promotion

payment

POST	/payment/tyro_webpay	Pay order for online shop using tyro (amount is in cent, e.g. 12.10 will be 1210)	post_payment_tyro_webpay
POST	/payment/tyro_webpay_authorise	Authorise a pay from tyro but not capture the money (amount is in cent, e.g. 12.10 will be 1210)	post_payment_tyro_webpay_authorise

POST	/payment /tyro_getpayrequest	get tyro getpayrequest by tyro transaction id	post_payment_tyro_getpayrequest
POST	/payment /tyro_refund	refund payment by tyro transaction id	post_payment_tyro_refund
POST	/payment /tyro_webpay_capture	capture a pay from tyro that is authorised (amount is in cent, e.g. 12.10 will be 1210)	post_payment_tyro_webpay_capture
POST	/payment /tyro_webpay_void	void a pay from tyro that is authorised (amount is in cent, e.g. 12.10 will be 1210)	post_payment_tyro_webpay_void
POST	/payment /tyro_merchant_list	get the list of tyro merchant	post_payment_tyro_merchant_list
POST	/payment /tyro_authorise_merchant	authorise tyro merchant	post_payment_tyro_authorise_merchant
POST	/payment /tyro_location_list	get the list of tyro locations	post_payment_tyro_location_list
POST	/payment /tyro_create_reader	create the tyro readers	post_payment_tyro_create_reader
POST	/payment /tyro_list_reader	get the list of tyro readers	post_payment_tyro_list_reader
POST	/payment /tyro_create_connection	tyro create connection for embedded payment	post_payment_tyro_create_connection
POST	/payment /tyro_iclient_record	tyro create link the transaction with the eftpos order	post_payment_tyro_iclient_record
POST	/payment /tyro_iclient_record_update	tyro create link the transaction with the eftpos order	post_payment_tyro_iclient_record_update
POST	/payment /omi_webpay	Pay order for online shop using omipay (amount is in cent, e.g. 12.10 will be 1210)	post_payment_omi_webpay
POST	/payment /omi_scanpay	Create a scan pay order using omipay (amount is in cent, e.g. 12.10 will be 1210)	post_payment_omi_scanpay
POST	/payment /transaction	Get transaction associate with the order_id	post_payment_transaction
POST	/payment /configure	Get configure input for different payment platform	post_payment_configure

POST	/payment/update_configure	update configure for the credential	post_payment_update_configure
POST	/payment/get_configure	get a configure for the credential	post_payment_get_configure
POST	/payment/add_worldline_transaction	add a worldline transaction to server to store	post_payment_add_worldline_transaction
POST	/payment/tyro_webpay_device	Pay order for online shop for pospal device	post_payment_tyro_webpay_device
POST	/payment/credit_webpay	Pay order for online shop using business credit	post_payment_credit_webpay
POST	/integration/pospal/sync_product	Copy product from pospal and store the product into our database	post_integration_pospal_sync_product
POST	/integration/pospal/update_credential	Update the pospal credential	post_integration_pospal_update_credential
POST	/integration/pospal/get_credential	get the pospal credential	post_integration_pospal_get_credential
POST	/integration/square/sync_product	Copy product from pospal and store the product into our database	post_integration_square_sync_product

kiosk

POST	/kiosk/add	Retrieve a token for a specific kiosk machine using its MAC address.	post_kiosk_add
POST	/kiosk/delete	Delete a kiosk machine	post_kiosk_delete
POST	/kiosk/link_product	link a kiosk machine with a products	post_kiosk_link_product
POST	/kiosk/unlink_product	unlink a kiosk machine with a products	post_kiosk_unlink_product
POST	/kiosk/kiosk_product	get all linked product with a kiosk machine	post_kiosk_kiosk_product
POST	/kiosk/make_order	Make an order from the a kiosk machine	post_kiosk_make_order
POST	/kiosk/kiosk_order	get all order made from a kiosk, if detail is set true, return full detail	post_kiosk_kiosk_order

POST **/kiosk/last_modified** get last_update related to a kiosk **post_kiosk_last_modified**

POST **/kiosk/temp_order** Make an temp order from the a kiosk **post_kiosk_temp_order**

shop

POST **/shop/add_business** Add a business **post_shop_add_business**

POST **/shop/update_business** update the tax detail of a business, this include tax detail and business privacy statement **post_shop_update_business**

POST **/shop/add_admin** Add an admin to a shop **post_shop_add_admin**

POST **/shop/remove_admin** remove an admin from a shop **post_shop_remove_admin**

POST **/shop/update_shop** Update a shop. Token is mandatory, other fields are optional (will retain existing values if omitted). **post_shop_update_shop**

POST **/shop/business/add_profile** add a registration form associate with the business **post_shop_business_add_profile**

POST **/shop/business_shop** list all existing shop owned by a business **post_shop_business_shop**

POST **/shop/list_shop** list all existing shop managed by the admin **post_shop_list_shop**

POST **/shop/list_business** list all business that the admin own **post_shop_list_business**

POST **/shop/shop_credentials** list all credentials the shop have **post_shop_shop_credentials**

POST **/shop/business_id** given a device id and device type, find business_id associate with it **post_shop_business_id**

POST **/shop/set_shop_product** set and link a product to a shop **post_shop_set_shop_product**

POST **/shop/set_all_shop_products** set and link all products in a business to a specific shop **post_shop_set_all_shop_products**

POST **/shop/shop_product** get all products from a shop **post_shop_shop_product**

POST	/shop/active_product	get an active products from a shop	post_shop_active_product
POST	/shop/add_business_permission	add a permission to a shop	post_shop_add_business_permission
POST	/shop/get_business_permission	get a permission from a business	post_shop_get_business_permission
POST	/shop/update_business_permission	update a permission of a shop	post_shop_update_business_permission
POST	/shop/delete_business_permission	delete a permission from a business	post_shop_delete_business_permission
POST	/shop/add_agent_admin	give a permission to an admin to manage the permission of a business	post_shop_add_agent_admin
POST	/shop/get_agent_admin	get a list of business that the manager can manage	post_shop_get_agent_admin
POST	/shop/get_business_agent	get a list of agent that is managing the business	post_shop_get_business_agent
POST	/shop/get_agent_business	get a list of business that a agent can manage	post_shop_get_agent_business
POST	/shop/product_category	get a category of product sold by shop	post_shop_product_category
POST	/shop/remove_agent	remove a agent	post_shop_remove_agent
POST	/shop/add_staff	Add a staff to a shop	post_shop_add_staff
POST	/shop/auth_staff	authenticate a staff for a shop	post_shop_auth_staff
POST	/shop/add_section	add a section to a shop	post_shop_add_section
POST	/shop/update_section	update a section	post_shop_update_section
POST	/shop/delete_section	update a section	post_shop_delete_section

POST	/shop/shop_section	get sections from a shop	post_shop_shop_section
POST	/shop/add_table	add a table to a section in a shop	post_shop_add_table
POST	/shop/section_table	get tables from a section in a shop	post_shop_section_table
POST	/shop/update_table	update a table in a section in a shop	post_shop_update_table
POST	/shop/delete_table	delete a table in a section in a shop	post_shop_delete_table
POST	/shop/table_detail	get a table by table_id	post_shop_table_detail
POST	/shop/bind_warehouse	bind a warehouse to a shop	post_shop_bind_warehouse
POST	/shop/unbind_warehouse	unbind a warehouse from a shop	post_shop_unbind_warehouse
POST	/shop/add_printer	add a printer to a shop	post_shop_add_printer
POST	/shop/shop_printers	get printers from a shop	post_shop_shop_printers
